Mercoledì 5 aprile 2017 ore 15:00, Aula V12

STORIES OF HOUSES

Javier Sánchez Merina

Dr. Javier SM teaches Architecture Design Studio at Alicante University. His Unit researches on the origins and negotiations inherit in contemporary architecture and the collective it belongs. These immaterial relationships explain the final results of projects, although they usually are not mentioned in the architectural discourse. From this standpoint, he has developed projects that focus on the clients' specific requirements, in particular those with neurological disorders, creating a Therapeutic Architecture for Alzheimer and Autism.
